Subject: Saint Gobain Stormwater outfall

Good morning, I have added a link at the bottom of the page to the latest testing for the storm water outfall located on the Saint Gobain property. Currently at 2200 PPT for PFOA alone!

I have been specifically told by NHDES that this an EPA issue and they are NOT responsible for it. NHDES is seriously dropping the ball on ALL things SG and in my opinion seems to be derelict in their duties to protect the people of Merrimack.

If you recall, SG left Vermont and moved to NH because of the less restrictive regulations and even after all of the PFAS issues of the last 2 years, (known by us) and the ATSDR report, NHDES has not made any move to PROTECT us. NHDES continues to allow SG to poison us on a daily basis. We have NO ONE looking to help us, improve our contamination or PROTECT OUR CHILDREN. Our state motto is "Live free or Die", I feel it should be "Move to NH AND DIE"

As always, I thank you for your time and attention.
